TOTAL CUSTOMER SATISFACTION

Since 1988, Turboanalysis, Inc has earned the trust of our worldwide customers by successfully delivering quality parts and services to the aviation industry. Our goal is to deliver unsurpassed levels of quality products and services to the aviation industry. We assist our valued customers with their daily maintenance needs, A.O.G. requirements, and comprehensive parts provisioning. Turboanalysis, Inc. offers a variety of long and short term ordering agreements that support various types of airframe and engine material. We support all types of airlines, major repair stations and overhaul centers, various airforces around the world, and other aviation product and service re-sellers.

WORLDWIDE SERVICE

Our primary office is located in Phoenix, Arizona USA, just minutes from Sky Harbor International Airport. We service our customers from our main headquarters and through a network of international sales representatives. Support is delivered from our 50,000 sq. ft. facility which is equipped with more than 60,000 line items of airframe and aircraft engine material. With close proximity to the international airport and millions of dollars worth of inventory, we can easily ship on demand and in a timely matter.

COMPLETE PROGRAM SUPPORT & SERVICES FOR:

- Rolls Royce T56 / 501D, and Model 250 engines
- Boeing Aircraft B707 – B767
- McDonnell Douglas Aircraft DC8 – DC10, MD80'S
- Lockheed L-100, L1011
- Pratt and Whitney Engines JT3D-JT15D
- Honeywell APU's GTCP85 and 36 Series

Quality Assurance

“To continually improve our quality system and to provide the highest quality material and service to our valued customers in a prompt and cost-effective manner.”

Turboanalysis, Inc. is ISO 9002 certified, and we are a member of the Airline Suppliers Association. As a supplier of new, repaired, and overhauled material, we guarantee that all material delivered meets or exceeds FAA, JAA, and DOD, and other international quality standards. All material is received and shipped only after our rigorous inspection and quality assurance processes have been performed. The effectiveness of our quality control program is validated by the outstanding grades we receive on our mandatory ISO quality control surveys.

PRODUCTS AND SERVICES

As a full service provider, our team of experts can support all phases of overhaul and maintenance.

PRODUCTS SUPPORTED

- Complete Engines
- Engine Modules, Accessories and Components
- Airframe Components
- Avionics
- Electrical Components
- Landing Gears
- Instrument Items
- Hydraulic Parts
- Pneumatic Components
- Tooling
- Consumable Items

SERVICES SUPPORTED

Parts Sourcing and Procurement

A single procurement source which allows our customers to consolidate purchasing and freight activities. The benefits to our customers are substantial savings in purchasing and freight costs as well as reduced turn times.

Consignment Inventories

Daily maintenance and critical items are available for immediate shipment. Consignment inventories allow for zero inventory carrying costs, and to help our customers improve their overhaul turn-times.

Repair Management

Our valued customers depend on our technical expertise to source and manage a variety of their aircraft and aircraft engine components. All material is overhauled in accordance with the appropriate technical specifications and manuals under our ISO program. Our repair management activities enable our customers to focus their efforts on other important activities.

Basic Order Agreements

Prices are firm and fixed for a pre-determined period of time. Ordering agreements allow our valued customers to better meet their financial objectives.
